
WORLD-CLASS MANUFACTURING, RESPONSIBLY DELIVERED.
DJALTEX

Founded in 1979, DIALTEX is a Sri Lanka–based boutique apparel manufacturer partnering with discerning fashion brands across the globe. Rooted in craftsmanship and driven by innovation, we specialize in transforming ideas into impeccably finished garments, crafted with precision, care, and intent.

Where Craft Meets Contemporary Fashion.

From concept development to final delivery, DIALTEX offers a fully integrated, end-to-end production experience. Our approach is deliberately boutique: flexible, detail-obsessed, and deeply collaborative, allowing every collection to retain its unique identity while meeting the highest standards of quality and consistency.

We design and manufacture premium woven garments across men's, women's, and kids, with particular expertise in:

Denim jackets & contemporary outerwear
Dresses, bottoms & tailored silhouettes
Chinos, cargo pants & formal trousers
Custom-developed kids wear collections

Crafting Garments with Purpose and Precision.

Our in-house design, prototyping, and sampling teams work closely with clients to refine fit, finish, and fabric; ensuring every piece meets both creative and commercial expectations.

Washing &
Finishing

Integrated. Intelligent. Vertical Manufacturing.

We are not built for volume alone;
we are built for brands that care deeply about
how their garments are made.

Boutique-scale flexibility for brands that value agility and attention to detail

In-house washing capabilities ensuring precision finishes and quality control

Decades of expertise, refined over generations

A sustainability-led mindset, embedded across our operations

WASHING & DYEING

We specialize in both dry and wet processes:

Wet processes

- Stone washing
- Synthetic stone wash
- Sustainable Acid wash (without pp)
- Bleach wash
- Super stone washing
- Stone free denim washing
- Stone and less water enzyme wash
- Sky bleach wash
- Sustainable cotton ball wash

Garment dye processes

- Reactive dye
- Direct dye
- Pigment dye
- Nylon dye
- Sulfur dye
- Double dye
- Metal complex dye (Seta dye and officina39)
- Natural dye
- Dye +acid wash (colour denim wash)

Wet processes

1) Stone washing
Classic wash using pumice stones to abrade denim, creating a soft, faded, worn look.

2) Super stone washing
An intensive stone wash with more stones/time to achieve heavy fading and strong vintage look.

3) Synthetic stone wash
Uses artificial stones (rubber/ceramic) instead of natural pumice to give a controlled, uniform fade with less damage

4) Sustainable Acid wash (without pp)
Creates high-contrast, cloudy patterns using eco-friendly alternatives instead of potassium permanganate (PP)reduces chemical impact.

5) Bleach wash
Uses bleaching agents (like sodium hypochlorite) to lighten denim color and create strong fading effects.

6) Sky bleach wash
A light, uneven bleach effect giving a sky/cloud-like appearance with soft contrasts.

7) Stone free denim washing
Uses enzymes instead of stones to create a soft, faded finish reduces machine damage and waste.

8) Stone and less water enzyme wash
Combination of enzymes + minimal stones + low water usage to achieve eco-friendly soft fading.

9) Sustainable cotton ball wash
Uses cotton balls soaked in chemicals instead of stones to create localized fading, reducing damage and improving sustainability.

Dry process

Compact laser technology has been designed for maximum production flexibility, precision, and power, with a compact design and high cost efficiency

- Sustainable laser
- Laser printing
- Hand scrapping + Whiskering
- Ripped effect
- Body, hem and bootcut damage

Machinery Available:

- Tonello (up system) washing machines - 15 machines
- Tonello dryers
- Tonello ozone machines
- Sample development unit
- 3D dummy
- Curing oven
- Desk crunch wrinkle press
- Body grinding
- Scraping with mold
- Round whisker
- Stereo wrinkle press machines

Our people are our greatest strength.
We believe exceptional garments begin with empowered, respected teams. From safe and inclusive workplaces to ongoing learning, fair practices, and a culture of mutual respect, employee well-being is embedded into how we operate every day.

Ethical by Practice, Human by Design

When our people thrive, so does the craft, care, and quality behind every piece we create.
